## 1. nav.php — Site Navigation (included on all pages)

27 fixes

| # | Element   | Issue                              | WCAG  | Fix Applied                           |
|---|-----------|------------------------------------|-------|---------------------------------------|
| 1 | Skip link | No skip navigation link — keyboard | 2.4.1 | Added <code>&lt;a href="#main-</code> |

| #  | Element                           | Issue                                                              | WCAG  | Fix Applied                                                                         |
|----|-----------------------------------|--------------------------------------------------------------------|-------|-------------------------------------------------------------------------------------|
|    |                                   | users must tab through entire nav on every page                    |       | content" class="skip-link">Skip to main content</a> with show-on-focus CSS          |
| 2  | Skip link CSS                     | No skip link stylesheet rules present                              | 2.4.1 | Added inline <style> with position:absolute; top:-50px and :focus { top:0 } pattern |
| 3  | <nav> top bar — role="navigation" | Redundant role="navigation" on <nav> element                       | 1.3.1 | Removed role; added aria-label="Site header"                                        |
| 4  | <nav> main — role="navigation"    | Redundant role="navigation" on <nav> element                       | 1.3.1 | Removed role; added aria-label="Main navigation"                                    |
| 5  | Sidenav trigger href="#"          | href="#" causes page jump to top on click                          | 2.1.1 | Changed to href="#!"                                                                |
| 6  | Sidenav trigger — icon only       | Hamburger menu button has no accessible label — icon ligature only | 1.1.1 | Added aria-label="Open navigation menu"                                             |
| 7  | Dropdown trigger #1 href="#"      | Page jump on click                                                 | 2.1.1 | Changed to href="#!"                                                                |
| 8  | Dropdown trigger #2 href="#"      | Page jump on click                                                 | 2.1.1 | Changed to href="#!"                                                                |
| 9  | Dropdown trigger #3 href="#"      | Page jump on click                                                 | 2.1.1 | Changed to href="#!"                                                                |
| 10 | Dropdown trigger #4 href="#"      | Page jump on click                                                 | 2.1.1 | Changed to href="#!"                                                                |
| 11 | Dropdown trigger #5 href="#"      | Page jump on click                                                 | 2.1.1 | Changed to href="#!"                                                                |
| 12 |                                   | Page jump on click                                                 | 2.1.1 |                                                                                     |

| #  | Element               | Issue                                                                                    | WCAG  | Fix Applied                                                                   |
|----|-----------------------|------------------------------------------------------------------------------------------|-------|-------------------------------------------------------------------------------|
|    | Dropdown trigger #6   |                                                                                          |       | Changed to                                                                    |
|    | <code>href="#"</code> |                                                                                          |       | <code>href="#!"</code>                                                        |
| 13 | Dropdown trigger #1   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 14 | Dropdown trigger #2   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 15 | Dropdown trigger #3   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 16 | Dropdown trigger #4   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 17 | Dropdown trigger #5   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 18 | Dropdown trigger #6   | Missing <code>aria-haspopup</code> and <code>aria-expanded</code>                        | 4.1.2 | Added <code>aria-haspopup="true"</code><br><code>aria-expanded="false"</code> |
| 19 | Material icon #1      | <code>&lt;i class="material-icons"&gt;</code> ligature text read aloud by screen readers | 1.3.1 | Added <code>aria-hidden="true"</code>                                         |
| 20 | Material icon #2      | Same as above                                                                            | 1.3.1 | Added <code>aria-hidden="true"</code>                                         |
| 21 | Material icon #3      | Same as above                                                                            | 1.3.1 | Added <code>aria-hidden="true"</code>                                         |
| 22 | Material icon #4      | Same as above                                                                            | 1.3.1 | Added <code>aria-hidden="true"</code>                                         |

| #  | Element                                     | Issue                                                                              | WCAG  | Fix Applied                                                                                   |
|----|---------------------------------------------|------------------------------------------------------------------------------------|-------|-----------------------------------------------------------------------------------------------|
| 23 | Material icon #5                            | Same as above                                                                      | 1.3.1 | Added <code>aria-hidden="true"</code>                                                         |
| 24 | Material icon #6                            | Same as above                                                                      | 1.3.1 | Added <code>aria-hidden="true"</code>                                                         |
| 25 | Orphaned <code>dropdown-titles</code> menu  | Menu contains only <code>href="#!"</code> placeholder links — no real destinations | 2.4.4 | Removed menu entirely                                                                         |
| 26 | Orphaned <code>dropdown-titles2</code> menu | Same — mobile duplicate of above                                                   | 2.4.4 | Removed menu entirely                                                                         |
| 27 | <code>id="main-content"</code> target       | Skip link has no corresponding target anywhere on the site                         | 2.4.1 | Added <code>id="main-content"</code> to <code>.light-tan</code> wrapper on every content page |

## 2. index.php — Homepage

13 fixes

| # | Element                                    | Issue                                                                                    | WCAG  | Fix Applied                                                                        |
|---|--------------------------------------------|------------------------------------------------------------------------------------------|-------|------------------------------------------------------------------------------------|
| 1 | <code>&lt;title&gt;</code>                 | Non-unique — all pages share "Sandusky County Clerk of Courts"                           | 2.4.2 | Kept as site identity title for homepage; unique titles applied to all other pages |
| 2 | Parallax <code>&lt;br&gt;&lt;br&gt;</code> | Empty spacer elements used for layout                                                    | 1.3.1 | Removed both                                                                       |
| 3 | Parallax image                             | <code>alt="Peaceful Tree Scene"</code> — decorative background image has descriptive alt | 1.1.1 | Changed to <code>alt=""</code>                                                     |
| 4 | <code>.light-tan</code> wrapper            | Missing <code>id="main-content"</code> — skip link has no target                         | 2.4.1 | Added <code>id="main-content"</code>                                               |
| 5 | Main content area                          |                                                                                          | 1.3.1 |                                                                                    |

| #  | Element                                    | Issue                                                                                                     | WCAG  | Fix Applied                                                                             |
|----|--------------------------------------------|-----------------------------------------------------------------------------------------------------------|-------|-----------------------------------------------------------------------------------------|
|    |                                            | No <code>&lt;h1&gt;</code> in main content — parallax h1 may not be accessible in all contexts            |       | Added <code>&lt;h1 class="sr-only"&gt;Sandusky County Clerk of Courts&lt;/h1&gt;</code> |
| 6  | Card image #1                              | <code>alt</code> text duplicates adjacent <code>&lt;h4&gt;</code> — double announcement by screen readers | 1.1.1 | Changed to <code>alt=""</code>                                                          |
| 7  | Card image #2                              | Same as above                                                                                             | 1.1.1 | Changed to <code>alt=""</code>                                                          |
| 8  | Card image #3                              | Same as above                                                                                             | 1.1.1 | Changed to <code>alt=""</code>                                                          |
| 9  | Card image #4                              | Same as above                                                                                             | 1.1.1 | Changed to <code>alt=""</code>                                                          |
| 10 | Card heading #1<br><code>&lt;h4&gt;</code> | Heading jumps from h1 to h4 — skips h2 and h3                                                             | 1.3.1 | Changed to <code>&lt;h2&gt;</code>                                                      |
| 11 | Card heading #2<br><code>&lt;h4&gt;</code> | Same as above                                                                                             | 1.3.1 | Changed to <code>&lt;h2&gt;</code>                                                      |
| 12 | Card heading #3<br><code>&lt;h4&gt;</code> | Same as above                                                                                             | 1.3.1 | Changed to <code>&lt;h2&gt;</code>                                                      |
| 13 | Card heading #4<br><code>&lt;h4&gt;</code> | Same as above                                                                                             | 1.3.1 | Changed to <code>&lt;h2&gt;</code>                                                      |

### 3. pay.php — Pay Online

14 fixes

| # | Element                                       | Issue                 | WCAG  | Fix Applied                                         |
|---|-----------------------------------------------|-----------------------|-------|-----------------------------------------------------|
| 1 | <code>&lt;title&gt;</code>                    | Non-unique page title | 2.4.2 | <i>Pay Online   Sandusky County Clerk of Courts</i> |
| 2 | Parallax<br><code>&lt;br&gt;&lt;br&gt;</code> | Empty spacer elements | 1.3.1 | Removed                                             |
